

Your Shop's Own App

Nova App Development · Mobile ordering + rewards for independent coffee shops

Your customers already use an app like this every day. It's just not yours.

Nova App Development builds your coffee shop its own app — your name, your logo, your menu — with the three things that keep regulars coming back:

- **Order ahead.** Customers order and pay from their phone, walk in, and skip the line. You hand them a cup, not a wait.
- **A rewards program you control.** Stars on every purchase — in the app *and* at the register, automatically. You set the rewards: free drip at 50 stars, free pastry at 100, anything you like. No punch cards.
- **A direct line to your regulars.** Double-Star Tuesday, a birthday drink, a slow-afternoon push — you decide, it shows up on their phones.

No new hardware. No new workflow.

- Works with the **Square register you already own**. App orders appear on your register like any other order; counter sales earn stars automatically; marking an order ready at the register updates the customer's phone live.
- No app-store downloads for customers — they **scan a QR code at your counter** and your app is on their phone in one tap.
- Money goes **straight to your bank** (via Stripe, same daily payout rhythm as your card machine). We never hold your money.
- Your customer list and data are **yours, not ours** — unlike marketplace apps that list you next to your competitors.
- We do the setup for you: menu, photos, branding, staff training. You keep making coffee.

Founding-customer offer (first 5 shops only)

	The deal
Setup (branding, menu, training)	\$0 — no build fee, ever
Monthly	\$312/mo — founding shops lock this rate for 12 months
Cut of your sales	0%
Cancel	Anytime, 30 days notice, no long-term contract
Billing starts	Only when your app is live

If the app doesn't earn its fee back, cancel — no hard feelings. Two or three extra orders a day covers it.

What happens if you say yes

1. **This week:** a 30–45 minute sit-down — your menu, your colors, your reward rules.
2. **1–2 weeks later:** your app is live. We connect your Square register and train your staff (about an hour).
3. **Launch week:** QR-code table tents and register signs (we provide them), plus a join-day bonus to kickstart sign-ups.

Try it right now: open base-production-175d.up.railway.app on your phone — that's a live demo shop. Place a fake order, earn stars, poke around. What you see is what your customers would get, in your branding.
